THERE are thousands of factorwere to become a law, and before the campaign closes every voter understand at least that part of the Presidential issue which bears upon himself. To cast a vote for the ticket which could not triumph without resulting in a lock-out would be madness. All the boodle, foreign and domestic, which could be raked together would be poor recompense for such a calamity as that. The tariff, as a general issue, is hard to understand, but when it comes down to practical application it is the simplest of all political questions, and comes the nearest home to the voter's own pocket and fireside. Such a campaign as the one now unfolding is bound to be a growth on its Republican side. THE Democrats of the Pacific Coast have ceased in despair from their attempt to direct popular attention from the great issue of free trade versus protection, by crying "wolf," upon General Harrison's Chinese record. His record proved to be a dog that would not fight for them, and the utmost that could be said against General Harrison's position upon the Chinese question six years ago when it was a new question to the Eastern States, is that he advocated then just what President Cleveland advocates now-a remedy for the difficulty by treaty regulation. The Democratic party and Cleve-land have just reached the point of enlightment which was General Harrison's six years ago. General Harrison meanwhile, with the rest of the Republican party, has advanced in knowledge and

POLITICAL POINTS.

The London Saturday Review ob-cts to the Republican platform be-sure it is "ostentatiously patriotic." President Cleveland is not a voter anywhere in the United States, hav-ing given up his residence in Buffalo.

"This is inspiration? This is inspiration!" shouted an exultant Democrat while flaunting his red bandana in the face of a Republican in Alvany, Mo., the other day. "Yes," replied the other, "inspiration to a bull, a Communi-t, a turkey-gobbler and a Dem-ocrat."

Several of the most notorious of these characters received free passes to leave town within a certain time, and they went. In July. 1874, five men attacked and attempted to rob W. C. The reply was a taunting laugh, as they stood at bay with drawn revolvers. Pointing his gun at one, the officer warned him to put down his weapon before he counted three, or he would shoot. The warning was not heeded, and the officer fired, lodging two balls in the man's oreast. The others surrendered, and were conveyed to Keno by their placky captor. In two weeks the memoers of the gang were tried, and sent to Car-son for twelve years.

It is almost impossible to get at the exact cost of blowing out stumps with Hercules powder, as it depends upon the size and condition of the stumps.

By condition I mean: First, if the

By condition I mean: First, if the stump stands on a firm or mucky, sandy soil. Second, if it is solid or partly rotten.

Of course, it makes a greet deal of difference as to the size of the stump; a large stump will take from one to one and a half pounds, while a small one only requires about one-half pound, and perhaps less.

In handling the powder one cannot use too much precaution, although if handled carefully the powder is safe.

I got my powder for about twenty-

I got my powder for about twenty-five-cents per cartridge of one-half pound, with cap and fuse complete; but by buying large quantities I presume it could be purchased for less.

There is a book of directions that

comes with the powder, and these should be carefully followed. PAINE'S CELERY COMPOUND quickly restores the liver and kidneys to perfect health. This curalive power combined with its nerve tonics, makes it the best remedy, for all kidney complaints. Now if the ground is solid, the powder can be used by drilling down under the roots of the stump, and as nearly under the centre as possible, placing the charge there and banking it up some, so that the full force of the powder will be against the

PAINE'S CELERY COMFOUND strengthens the stomach, and quiets the geryes of the diges-tive organs. This is why it cures even the worst cases of Dyspepela. Always use fuse enough, so that after lighting you can get back out of the way.

If the ground is soft, the best way is to bore into the centre of the stump is to bore into the centre of the stump and place the charge, for if it is placed under, as in the other case, it will only blow the dirt out and leave the stump standing.

It can also be used successfully on bowlders, and thus rid the ground of these troublesome things.— Faum and Fireside. WELLS, RICHARDSON & CO., Prop's

The Colorado l'ost

Miss Jeseic A. Cela is a Calorado girl. She has written a volume of poetry which is purely Coloradon.

Boundless expanse, lofty mountains, beetling errors, dark cantas, rushing cataracts, filtered sunshine, waving grass, and sturdy, honest Western flowers, with here and there a glimpse of eactus abound.

The first poem in the book, "Colorado," is replete with gams of thought.

Denver's inhabitants are 70,000 up to The largest, thriftiest city of Col-And the capital of the State,

And the capital of the State,
And county seat of Arapahoe."
Miss Cole sorrows but little, but
corrows deeply when she does sorrow.
In the poem entitled a "Broken
Life" she describes the feelings of a
young girl who has been jilted.
She says: Monday, September 24,1888

"He told me that he loved me,
That with me he'd never part,
All at once he changed his mind,
And tramples on my very heart."
If I should live a thousand years— I'd never forget those broken vows,

Nor love another man. -[Denver (Col.) News.

Way to Smell a Flower.

"Never touch a flower with your cose when you inhale its perfume," said a gent evonan the other day in my hearing to her little daughter.

This lesson in the proprieties is one which all mothers might well impress

upon their children.

Among the ruling classes of China,
I am told, it is considered a gross
brench of etiquette to bury the nose
in the buds and blossoms of a

in the buds and blossoms of a bonquet. Surely, from an esthetic point of view, such practice is to be reprobated.

Who has not uniled at the appearance of those ardent lovers of the "stars of earth" who, for example, thrust their nasel organs deep down amid the perfume-laden lillies, and after many long-drawn inhalations make their face all golden with the pollen of the descerated bloom?

To treat in this way flowers that are intended for another seems almost a sacrilege. a sacrilege.

To say nothing of the injury done to the petals by such an invasion, there is something distasteful to sensitive persons in having their bouquets brought into such close contact with the "human face," no matter how "divine" it

may be.

The enjo ment of the perfume of flowers is keener and more refined when the fragrance is inhaled without touching the bloccom.—[Louisville Courier-Journal.
